

Qatar Cool wins two awards at the Climate Control Awards

Qatar District Cooling Company also known as Qatar Cool, a major district cooling company in the region, was announced the winner of the 'District Cooling Provider of the Year Award' and the 'Marketing Initiative' award during the Climate Control awards 2014, held at the Al Murooj Rotana Dubai, UAE, on the 19th November.

Qatar Cool received the awards for its district cooling service, energy efficiency, reliability and overall commitment to the nation and their customers, through their daily service and marketing collaterals. Qatar Cool owns and operates three plants two in the West Bay district, and one in the Pearl Qatar, where Qatar Cool operates the 'The Integrated District Cooling Plant' (IDCP), which is the largest district cooling plant in the world.

Qatar Cool earlier this year was awarded the prestigious award from the International District Energy Association (IDEA) for the 'Best District Cooling System of the Year' for the Pearl Qatar District, and was also awarded the 'Best District Cooling System of the Year' in 2012 for the West Bay District from IDEA.

The theme of the award ceremony was 'Responding to the nascent economic upturn... vision, preparedness and fortitude as enablers of a measured approach and of integrity in upholding best practices in the face of an anticipated rise in pace of demand'.

Mohannad Khader, Vice President Commercial, and Nahar Al Mutawah, Vice President Operation and Services were there to accept the award on behalf of Qatar Cool. Mohannad commented "Qatar Cool is committed to further developing the understanding of the District Cooling industry and being recognized by such prestigious awards adds further credibility to our commitment. Through delivering quality service combined with innovative ideas and initiatives we hope to not only improve district cooling knowledge that will benefit industrial growth, but more importantly enhance the implementation of sustainable products, services and solutions for the environment as well as for end-users."

Mohannad continued "Qatar Cool expressed delight at this most recent accomplishment, to win two more significant awards from the Climate Control, and to be recognized amongst our industry peers for the second time is a great tribute to the dedication of the Qatar Cool team. We recently signed a contract for the construction of fourth plant in Qatar, which is the third in the West Bay district and winning prestigious awards such as this only adds more momentum to our expansion plans."

Qatar Cool has won multiple international awards, including the District Energy Space Award and the Best District Cooling System in the World award for 2014 from the International District Energy Association (IDEA). Most recently it was also recognized by Kahramaa's 'Tarsheed', a national campaign to improve water and energy efficiency, for its energy conservation efforts in industrial buildings in Qatar.
